MAINTAIN THE BEAUTY OF YOUR GERARD ROOF

Normal Weathering:

Exposure to sunlight and extremes of the weather and atmosphere will eventually cause any colored surface to fade or suffer an accumulation of surface dirt or stains. The severity of any of these conditions depends upon the geographic location of your home, the cleanliness of the air in your neighborhood and many other local influences over which Gerard has no control.

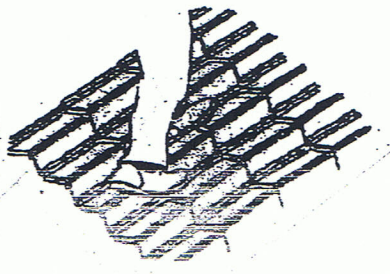

In areas of low annual rainfall, occasional rinsing off your roof with your garden hose will keep the roof looking clean and new.

If you or others must walk on your roof, the following are some helpful notes:

1. Keep traffic to a minimum.
2. Always wear soft-soled shoes.
3. Place feet in lower portions of panel, close to the nose (front edge) of each course.
4. Step only on upper panels at each side lap, so bottom panel supports side-lap.
5. For small areas, you can place a piece of plywood on top of the tiles and walk on top of that. The plywood distributes your weight evenly.
